

KNOW EXACTLY WHERE YOUR WORKERS ARE — AND HOW THEY ARE — LIVE.

01 WEAR	Supervisors receive live alerts, worker locations, health data, and AI-driven predictive warnings on a central dashboard
02 TRANSMIT	Supervisors receive live alerts, worker locations, health data, and AI-driven predictive warnings on a central dashboard
03 ACT	Supervisors receive live alerts, worker locations, health data, and AI-driven predictive warnings on a central dashboard

DIGITAL TWIN PLATFORM provides a real-time view of operations and sends intelligent instructions to team members

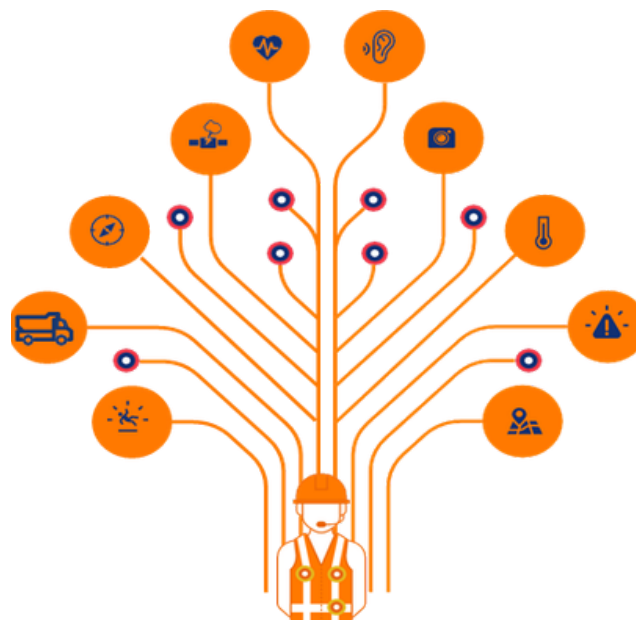

KEY PLATFORM FEATURES

- ›Modular & configurable— Integrate only the sensors you need from Wearin's partner network or third-party providers
- ›Unified battery & connectivity— One hub powers and manages all sensors for a full day; prioritises critical data transmission
- ›AI-powered predictive alerts— System detects risk patterns before incidents occur and prescribes preventive actions automatically
- ›Open API integration— Connects to existing ERP systems, corporate apps, mobile worker apps, and third-party platforms
- ›Bi-directional data flow— Supervisors can send instructions, alerts, and guidance directly back to field workers in real time
- ›Automated compliance reporting— Process checklists, near-miss reporting, and work planning built into the platform

UNIFIED APPROACH — SOLVING THE WEARABLE TECHNOLOGY SILO PROBLEM

REAL-TIME DATA COLLECTED

- GPS Position & Location
- Heart Rate & SpO2
- Body Temperature
- Heat Stress Detection
- Fatigue Detection
- Man-Down Alert
- Multi-Gas Detection
- CO, CO2, H2S, CH4
- Radiological Sensors
- Live Video Feed
- SOS Button
- Fall Detection

TARGET INDUSTRIES

Mining Fire & Rescue Law Enforcement EMS Construction Oil & Gas Security Military
